Karolo ya boraro**Palo 3: Palo ya thanolo (translation passage)**

Bala palo e e fa tlase o bo o e ranolela kwa Setswaneng, mo pampiring ya dipotso.

Mr Thabo Pula is tapping into seedling production as a way of venturing into agribusiness in the country. He established the company called Seedlings in 2015, which specialises in commercial production of vegetable seedlings. The company produces vegetable seedlings of all types and sells to horticultural farmers across the country.

Speaking to Business Trends, Mr Pula said he was intrigued by shortage of seedling producers in the country. He then decided to contribute to the development of agribusinesses by helping farmers to produce quality crops with minimum labour at pre-planting stage. Located at Rusa, his seedling company provides assistance in selecting the best variety of seeds, the design and installation of irrigation systems as well as net shading by skilled personnel.

He started the business through funding by the Ministry of Youth, Sports and Culture Development through the Youth Development Fund at the tune of P98 000.
